EMPLOYEE HEADCOUNT TRENDS

Employee headcounts are typically reported twice per year in April (spring) and October (fall) and are used to track employee changes over time. This Headcount means that each individual person counts as one employee whether his or her appointment is full-time or part-time.

Spring headcounts are typically higher than fall headcounts as spring includes an increase in seasonal and research field employees. Spring headcounts are generally not compared to fall as comparison between these periods have greater variance. Additionally, there is a change in fiscal year (annually) between these time periods.

Spring 2023 and fall 2023 headcounts increased from the prior period (spring 2022 and fall 2022, respectively). It is expected that employee counts will continue to trend upward as UAF invests in targeted areas, including research, as sponsored activity has increased.

Authorized Position History

Appendix 6.A.3 ²UA State Authorized PCN Change, announcement to Budget Workteam, October 9, 2023

The Office of Finance and Accounting (OFA) tracks position status in the following categories: filled, in recruitment status, vacant/hold unfilled for a period of time (as defined), or in reserve. This process allows for consistent standards in the budgeting, expenditure, recruitment, and reservation of positions across the system.

Historically, OFA also tracks the overall UAF Position Control Number (PCN) count that is managed in conjunction with the UA System Office and were tracked closely by the state of Al aska. However, effective FY24, the state will no longer require the UA System to manage within a fixed number of state -authorized PCNs. This is an improvement to the PCN reporting process. UA will continue to have processes in place to demonstrate good position management as it relates to budget.

6.3 reflects UAF's authorized position Table change future, UA/UAF will no longer report authorized positions to the state of Alaska.
