Dear Friends,

Each of us, every day, has an opportunity to teach someone, learn from someone and help someone. Tonight, we honor the dedicated individuals that are doing just that — UAF's steadfast philanthropic supporters and our recipients of the Emil Usibelli Awards for Distinguished Teaching, Research and Public Service.

UAF is a richly diverse place. We are fortunate to have such a variety of classes, lectures, concerts, theater, athletics and so much more. This evening we celebrate you — the individuals, corporations and foundations who are vital to the success of UAF — as well as our

Welcome to the University of Alaska Fairbanks 2015

Celebration of Giving

E U A

OPENING REMARKS

Mike Powers, Interim Chancellor

EMCEE

Mike Sfraga, Vice Chancellor for
University and Student Advancement

2015 DONOR HONOREES

We are pleased to recognize the following donors:

Alyeska Pipeline Service Company, Corporate

Bill Stroecker Foundation, Foundation

Je and Sue Cook, Longevity

Joe Usibelli and Peggy Shumaker, Individual

2015 EMIL USIBELLI RECIPIENTS:

Presented by Susan Henrichs, Provost

We are pleased to recognize the following faculty:

Hajo Eicken, Professor of Geophysics, Distinguished Research

Pat Holloway, Professor of Horticulture Emeritus, Distinguished Public Service

David Newman, Professor of Physics, Distinguished Teaching

Alyeska Pipeline Service Company

Alyeska Pipeline Service Company supports the communities where its employees live and work, through philanthropic donations and by encouraging volunteerism by its employees. For nearly 45 years, Alyeska Pipeline Service Company has been a significant supporter of the University of Alaska Fairbanks. APSC frequently hires UAF alumni, putting them to work across the state. Alyeska's leaders are actively involved on university advisory boards and in multiple working partnership activities with the University.

Alyeska contributes to Alaska-based nonprofits and to Alaska-based arms of national nonprofits that are aligned with the company's values and philosophy — organizations that support underserved populations, health and social services, education, the environment and workforce development. In addition to their support of the Troth Yeddha' Legacy Initiative, Alyeska contributes generously to Alaska Native students pursuing a master's degree at the UAF School of Management, the UAF Rural Alaska Honors Institute which helps rural Alaskan students transition from high school to college, the UA Museum of the North, the UAF Geophysical Institute, the UAF Community and Technical College and KUAC.

Alyeska helps create a culture of giving by matching qualified employee donations or giving funds when employees contribute a certain number of volunteer hours. Alyeska always strives to lead by example.

F Bill Stroecker Foundation

William "Bill" G. Stroecker was born in Fairbanks in 1920. He was a prominent community and business leader for decades. Most knew Bill for his amazing musical talent and civic leadership throughout the Golden Heart Community. Bill Stroecker was a close friend to the University of Alaska Fairbanks and his support continues

Je and Sue Cook

For more than 40 years, Je and Sue Cook have been dedicated advocates and sup

Joe Usibelli and Peggy Shumaker

For more than 40 years, the Usibelli family has given generously to the University of Alaska Fairbanks and to the Fairbanks community, as well as supporting initiatives and programs across the state. They have invested in every aspect of our university — from student scholarships, to faculty support and capital projects. Most notably, Joe Usibelli served as co-chair of the fundraising campaign for the UA Museum of the North expansion. The Rose Berry Alaska Art Gallery is named in honor of the Usibelli matriarch, Joe's mother, and is part of the new wing, which opened in 2006.

In addition to the support of capital and student initiatives at UAF, the Usibelli Coal Mine established the Emil Usibelli Distinguished Teaching, Research and Service Awards to honor faculty members who demonstrate exemplary contributions in each of these three categories. Peggy Shumaker, a UAF professor of English at the time, was honored with a Usibelli Award for Teaching the same year that Joe Usibelli was awarded an honorary doctorate by UAF. Together they continue to support programs and areas in which they are passionate.

T E U A D T , R P S

The Emil Usibelli Awards for Distinguished Teaching, Research and Public Service are presented to UAF faculty who display extraordinary excellence in one of three categories representing the Land, Sea and Space Grant mission of the University of Alaska Fairbanks — teaching, research and public service. Those who receive an award are recognized for their exemplary contributions to the discovery, communication and use of knowledge.

First given in 1992, the awards are named for pioneer miner Emil Usibelli, who emigrated from Italy to America by ship in 1909. Emil arrived in Alaska in 1909.

D R

Hajo Eicken, Professor of Geophysics

Eicken arrived at UAF in 1998, after 10 years as a student and researcher at the Alfred Wegener Institute in Germany. His recent work focuses on Arctic sea ice in the context of a changing Arctic and global climate. His research addresses both scientific questions and the needs of diverse groups of people and industries in the Arctic. Eicken serves as interim director of UAF's International Arctic Research Center.

Eicken was awarded the 2010 Louis Agassiz Medal by the European Geophysical Union for his outstanding contributions to the study of the physical and biological properties of sea ice, through a combination of novel experimental techniques and theory. For example, he used fluorescent tracers in boreholes to monitor water transport through Arctic summer sea ice, thus enhancing the understanding of the summer melt and the development of melt-ponds. He also developed methods to measure brine volume in first-year sea ice, important to understanding how ice properties change over time.

In addition to his excellence as a researcher, Eicken's colleagues, in their letters of support, noted his skill at working across disciplines to advance both the public's and the scientific community's understanding of the Arctic. He places a high priority on educating students and the public, and has been an advocate for incorporating the knowledge of indigenous people into the scientific process.

"He has been a great ambassador for our university and for science," said Larry Hinzman, interim vice chancellor for research at UAF. "He is an inspiration to all who meet him and he has absolutely made the world a better place through his dedicated efforts to foster interdisciplinary collaborations."

Eicken has a degree in mineralogy from the Technical University of Clausthal in Germany and a doctorate in natural sciences from the University of Bremen in Germany.

D P S

Pat Holloway, Professor of Horticulture Emeritus

Holloway first came to UAF in 1975 as a research aid at what was then the Agricultural Experiment Station. After a three-year stint at the University of Minnesota, she returned to UAF in 1982 as a lecturer and instructor.

She is best known for two projects that have made their mark on the community and the state: the Georgeson Botanical Garden and Alaska's peony industry.

When Holloway first inherited what would eventually become the Georgeson Botanical Garden, it was an unlabeled and unnamed research program within the Agricultural and Forestry Experiment Station. It was not well connected to the public, she recalls, except for a one-day open house every year.

Over the years, Holloway and a plethora of volunteers and colleagues developed the research plots into one of Fairbanks' most-visited attractions and a center for numerous public outreach and education experiences.

"(The garden) is certainly a valuable asset, not only for UAF, but also for the entire Fairbanks community," said Steve Sparrow, recently retired interim dean of the School of Natural Resources and Extension. "None of this would have happened without Dr. Holloway's dedication, determination and hard work."

Holloway approached her peony work with the same initiative. Holloway learned that peonies, a popular wedding flower, were in bloom in Alaska during July, which was "out of season" everywhere else in the world. Her foresight paid off. Today, Alaska is home to more than 100 peony growers. In 2013, more than 32,000 peonies were exported from Alaska, and the industry is expected to continue its rapid growth.

"While all over the country, family farms are struggling, Alaskan farmers now have a niche crop that can compete economically with crops from the Lower 48," said Emily Reiter, one of the people who nominated Holloway. "Pat is such a shining example of a learned professor who can share research concepts with farmers, gardeners and the general public."

Holloway has a bachelor's degree in biology from Millersville University of Pennsylvania, a master's degree in horticulture from Washington State University and a doctorate in horticulture from the University of Minnesota.

D T

David Newman, Professor of Physics

Newman joined the UAF faculty in 1998, after working for five years as a Wigner Fellow and then research scientist at the Oak Ridge National Laboratory. He teaches courses across the physics curriculum, from introductory courses for non-majors to specialized graduate-level courses and seminars, consistently earning high marks in student evaluations, even in introductory courses. He serves as an advisor and mentor to undergraduate and graduate students.

"It is noteworthy that (his) nomination is from a student, and she clearly articulates what I have observed with Dr. Newman's teaching," said College of Natural Science and Mathematics Dean Paul Layer in his letter of support. "He is an engaging lecturer. He can command the attention of students in large lecture environments. He can make the most difficult topics in physics accessible and fun, and he really cares about student learning."

The student who nominated Newman, Joyce Dustin Demientie, is a national board-certified teacher who returned to UAF to study engineering after teaching for 25 years.

"David Newman is a much better teacher than I was," she said in her nomination letter. "He inspires and encourages real curiosity. He has the chutzpah and knowledge to open every class fielding random physics questions. I am impressed that he has never floundered with the barrage and always has a cogent answer."

In addition to encouraging questions and interaction, even in large classes, Newman is an advocate for using technology to enhance students' access to education. He records his lectures, homework and review sessions and makes them available to students for review, and requires a web project in all classes. He encourages graduate students to write blogs and to record their work, which teaches them to explain their science clearly to non-scientists.

Newman has a bachelor's degree in physics and mathematics from the University of Pittsburgh and a doctorate in physics from the University of Wisconsin-Madison.
