Values Statement # 2

|| Preserve access on the North Campus Area for education, research, outreach and recreation

Proximity of the North Campus Area to the developed UAF campus and community in ~~access~~ provides a valuable resource for education, research, outreach and recreation. ~~It is important to note that access for a use is not an absolute property right for all variations~~ ~~of use and in the absence of access, no interest can be held in any portion of~~ ~~the property to occur on the North Campus Area. The University should be in the best~~ ~~to facilitate the access requirements of allowed uses, as well as to provide users and make~~ ~~the necessary infrastructure available for users.~~

Values Statement # 3

Continue to provide opportunities for community involvement

that are compatible with the mission of North Campus.

Final Report

Lights along trails
Currently there are lights on approximately 2.2 miles of six trails. The lights are along the T field road, the potato field, and the lighted loop. The trails are frequently used at night. Some may like to see the amount of lighted ski trails expanded, others may not feel expanded the amount of lighted ski trails is appropriate on the 20000 Campus Area.

Campground
In the past a campground was maintained on West Ridge, near where the SAR dish is located. Many of the campers are still in place.

T field road
The T field road is one area where there is a high concentration of many other research projects. The lack of tree cover to prevent a high concentration of many other research projects.

High Resolution A.P. to expand the amount of lighted ski trails on the North Campus
If you feel the amount of lighted ski trails should be expanded.

The Biological Reserve
The Biological Reserve is a 1000 acre area that is currently used for research. The Biological Reserve is a 1000 acre area that is currently used for research.

Map
A map showing the layout of the campus with various research plots and trails marked in green and yellow.

Photographs
Several photographs showing different areas of the campus, including a large field, a road, and a building.

Text
Various text blocks providing additional information and context for the research plots and trails.
