Alaska Songbirds

There are over 5000 species of songbirds, which belong to the order *Passeriformes*. They live all over the world. Songbirds are known for diverse and elaborate songs, which they use for attracting mates and holding territory. Many songbirds migrate to Alaska each summer to breed, feed on abundant insects and plants, and raise their chicks. Learn more about some of Alaska's songbirds below!

White Crowned Sparrow
Zonotrichia leucophrys
