

Scrimshaw Crayon Art

Scrimshaw is the technique of carving designs on the surface of bone, ivory, or baleen. Create scrimshaw-inspired art by etching designs on paper!

Materials Needed:

White paper, crayons, toothpick or paperclip.

Caution Always supervise children when using sharp objects.

Instructions:

Step 1: Cut a piece of white paper in half.

Step 2: Prepare your paper.

For Black-and-White Art: Color the paper with black crayon. Fill in all the white spaces, so that as little white as possible shows through the black.
