

The following table shows the results of the experiment. The first column lists the trial number, the second column shows the number of correct responses, and the third column shows the reaction time in milliseconds. The data is as follows:

Trial	Correct Responses	Reaction Time (ms)
1	8	120
2	9	130
3	7	110
4	6	100
5	5	90
6	4	80
7	3	70
8	2	60
9	1	50
10	0	40

The graph below illustrates the relationship between the trial number and the number of correct responses. The x-axis represents the trial number, and the y-axis represents the number of correct responses. The data points are connected by a line, showing a downward trend.
